JORDAN'S PATENT MACHINE CARVING and MOULDING WORKS for Wood and STONE, Belvedere road, Lambeth, and 134, Strand. TAYLOR, WILLIAMS, and JORDAN beg to call the attention of the building community to a new feature of their establishment, and, at the same time, to thank their numerous patrons and friends for the very liberal support they have lately experienced. Which, they trust, will entitle the public, it will be found substantial endeavour to deserve, by giving their customers an increasing share of the advantages arising from the constant improvements in the machinery which they have just succeeded in applying to the production of the most authentic carving in Caen and other freestones, and in statuary marble.

T., W., and J. particularly solicit the attention of architects and builders to the fact that, by the use of this machinery, a very large carving both of time and money is effected, and, indeed, that in many cases they can deliver a well-finished article in Caen or the first item money than it can be obtained in cement, while their usual expense will, in some cases, be found to come into competition with the best kinds of composition ornament.—For prices and references apply at 134, Strand.

TESTIMONIAL FROM CHARLES BARRY, ESQ.

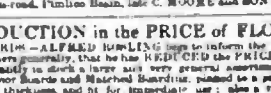
"Westminster, May 16th, 1848.

"Gentlemen.—In reply to your letter requesting my opinion of your recent Carving Machinery, I have much pleasure in stating, from my experience of more than two years in its application to the production of the wood carvings of the House of Peers, and other apartments of the New Palace, as well as other, that I am enabled to make the most favourable report concerning it, and to add that it has more than justified the favourable terms in which I recommended it in 1845 to her Majesty's Commissioners of Woods and Works for adoption.—I remain, Gentlemen, yours faithfully, CHARLES BARRY."

"Messrs. Taylor, Williams, and Jordan."

By Her Majesty's  Royal Letters Patent.

PITT'S PATENT SELF-ADJUSTING DOOR KNOBS AND LOOSE SPINDLES.



HART and SONS have to call the attention of architects, builders, and others, to their Improved Door Knobs, mounted for PITT'S PATENTED SPINDLES. The knobs are stronger, more durable and more ornamental in form, than those in ordinary use, as the spindles, being loose, do not require the objectionable side screw. They are more readily fixed, are suitable for every description of lock now in use, and, as they adjust themselves to doors of different thicknesses, without alteration, are particularly adapted for the country or for exportation. They are made to suit every style of decoration, in China, crystal, amber, fluted and plain, buffalo, horn, ivory, ebony, brass, &c., on rose with finger plates, bell-pulls, levers, &c.—May be obtained of all Ironmongers; or of the patentees and sole manufacturers, HART and SONS, Wholesale Ironmongers, 33, 34, and 35, Wych-street, Strand, London.

N.B. PITT'S PATENTED SPINDLE, being the only one that does not require a screw in the side of the knob or mounting, the use of any knob furnishers without such loose screws would be an infringement of the patent.
